

Streamline Your Supply Chain

Next Generation Logistics, Inc. announces real time application integration services.

Inverness, IL (Vocus) June 30, 2008 -- Next Generation Logistics, Inc. a leading supply chain consulting, managed services, and technology company, today announces our Application Development and Integration Services designed to help companies streamline business processes using [Microsoft BizTalk Server 2006 R2™](#). Whether you're integrating with 3rd party applications or exchanging data with trading partners we can facilitate the improvement and automation of your business processes.

You have worked hard to differentiate yourself from competitors. Consequently, your business is made up of several unique processes and applications. (Business Process Management/Automation) When making a decision to streamline those processes and systems, you wish to realize a specific Return on Investment (ROI) goal. BPM/A utilizes the principal of continuous improvement, integrating business units and verticals, and optimizing core supply chain work functions to reduce costs. The result is to help the organization increase its value and competitive advantage.

As a Certified Gold Partner and Microsoft ISV and Business Solutions provider utilizing the latest Microsoft BizTalk 2006 Server R2™, we can rapidly integrate into process and data integration for business applications and data stores. This includes integration solutions for the following applications Microsoft Dynamics, Oracle E-Business Suite, SAP, BPCS, and Lawson/Movex [business solutions](#).
