

The Human Touch HT-5005 Full-Body Massage Chair Puts Traditional Style Back into the World of Massage Products

Sore muscles have nowhere to hide as the human touch massage system eases away muscle pain, tension and fatigue.

Long Beach, CA ([PRWEB](#)) July 30, 2008 -- [Human Touch®](#), the leading brand of high-performance, design-oriented massage chairs for today's modern and traditional living spaces, is giving today's tired and achy muscles much needed relief with the unveiling of the Human Touch HT-5005 Full-Body Massage Chair. The HT-5005 will be introduced at the Las Vegas World Market show this week in Las Vegas.

Loaded with features typically found in chairs twice the cost, this bold and stylish [massage chair](#) features clean, classic lines to complement any home's décor - from contemporary and sophisticated, to traditional and rustic. The Human Touch HT-5005 Full-Body Massage Chair's advanced massage technology emulates the same techniques used by today's massage professionals as it envelops the user's body in an invigorating massage that eases muscle pain, tension and fatigue.

Delivering a comprehensive, head-to-toe massage experience, the HT-5005 satisfies the user's every need with automated programs that include; a penetrating neck massage, full back massage, deep lumbar massage and a foot and calf massage to compliment the three. This choice of three automatic massage programs with optional foot and calf massage rejuvenates the body's muscles, leaving nothing to be desired.

"The [HT-5005 Massage Chair](#) soothes muscles and delivers tension relief as its advanced features allow users to customize each massage according to specific needs and desires, providing an experience that is comparable to a professional massage session," says Rich Jorgensen, HumanTouch chief marketing officer. "From serious athletes looking to recover from intensive training to everyday people looking for a respite from the stress of today's hectic lifestyle, the HT-5005 empowers each user with the ability to maximize everyday comfort."

Human Touch's patented foot and calf massager massages calves in an upward, rolling motion. The multi-speed unit forces blood away from the feet toward the body's core, allowing fresh, nutrient rich blood to re-enter the calves and feet delivering healing and soothing comfort. Only Human-Touch offers this patented technology. The Foot and Calf massager rotates to transform into an ottoman which can then be automatically tucked away under the chair.

The HT-5005 retails for \$1,999 and is available at leading retailers across the country. For more information, please visit the [Human-Touch Home Page](#).
