Whole Foods, CVS, Walgreens, and Amazon Feature New Herbal Menopause Ingredient, EstroG-100®

EstroG-100 works 6 times faster than Black Cohosh, and women are catching on to this natural, next-generation menopause treatment.

Santa Fe, NM (PRWEB) September 03, 2014 -- Retailers are quickly adding EstroG-100 to their shelves. The new herbal product that treats menopausal symptoms in as few as 7-14 days is now available at Whole Foods, CVS, Walgreens, Sprouts, Meijer’s, Vitamin Shoppe, iHerb.com and, most recently, Amazon.

EstroG-100 has been shown to be one of the safest and most effective menopause symptom ingredients on the market versus other nutritional choices, according to the study "The Effect of Herbal Extract (EstroG-100) on Pre-, Peri- and Post-Menopausal Women."*** The same study showed that the ingredient has proven success treating debilitating symptoms, such as hot flashes, vaginal dryness, sleeplessness, fatigue, dizziness, nervousness, and menopause-related mood swings.

In addition to achieving “NDI” status with the FDA, the highest classification in the dietary supplement industry, clinical studies show that EstroG-100 is not estrogenic, which is critical for women’s health, nor does it affect weight, body mass index, or liver enzymes, all of which are associated with hormone replacement treatments. Additionally, each herbal extract of EstroG-100 showed the inhibitory effect on proliferation of breast cancer cells. A third completed human clinical study will be published in 2014, with the final summary confirming that participants had significant improvements in 10 of 12 symptoms. This matched the published second human clinical study completed in 2011.*

“The newest study is especially exciting because it is rare for a science-based nutra company to conduct three human clinical studies where the last 2 of 3 studies are consistent with each other in terms of the exceptional statistical effectiveness on multiple symptoms,” said Michael Jeffers, President of Helios Corp, the developer of EstroG-100.

Most herbal menopause remedies take 6-8 weeks to work and may affect just one of the many symptoms associated with menopause. After three placebo controlled, double blind and randomized human clinical studies, EstroG-100 has been proven to work with unheard of speed—in as little as a week—and improve multiple symptoms for menopausal women.

After initial successes at Walgreens and CVS—branded as Advanced Menopause Relief and Menopause Relief, respectively—the U.S. distribution of EstroG-100 has increased to multiple new retailers such as Whole Foods, Sprouts, Meijers, Drugstore.com, and Amazon.com. Women need only look for the EstroG-100 ingredient prominently displayed on the label or search where to buy EstroG-100 based on brand: Advanced Menopause Relief from CVS, Menopause Relief from Walgreens, Best EstroG-100 from Doctor’s Best, Herbal Pause from NOW Foods, and EstroG-100 from Swanson Nutrition.

According to the North American Menopause Society, 45 million women were in menopause as of 2013, and for the majority of those women the symptoms were aggressive and uncomfortable.*** EstroG-100, a game changer among nutritional-botanical supplements, offers a safe and performance-driven solution.
