

Next Generation Logistics, Inc. Celebrating 20 Years

Superior Supply Chain Services & Technology

Inverness, IL (Vocus) September 11, 2008 -- What started as a very small [supply chain consulting](#) company 20 years ago working with food manufacturers and distributors to improve distribution and logistical needs, has grown into a multi faceted supply chain solution provider. Over the years, Next Generation Logistics, Inc. has cultivated a unique footprint in the third party logistics world. With the advent of technology, our knowledge, and our people; NGL (as commonly referred by many) has leveraged their resources in building a compelling managed freight service, supply chain consulting offering, and the creation of a leading [transportation management software](#) system in FreightMaster TMS® Suite to help companies drive down costs, increase service levels, and become more efficient.

“NGL has long since turned the corner of just being a “3PL”, said John Riske Vice President, Business Development. “Our technology, experience and deep understanding of the entire supply chain provide a compelling one stop solution for our customers” says Riske. “We’ve received many accreditations in our years such as Top 100 Supply Chain Partner, Top 50 3PL provider, Top 100 IT Software provider, and Microsoft Certified Gold Partner, it’s nice to know we’re making an impact in the industry and most importantly with our customers.”

About Next Generation Logistics, Inc.

Next Generation Logistics, Inc. is a leading Supply Chain Consulting, Managed Freight Services, and Technology provider. For the past 20 years, NGL has worked with companies in the Food & Beverage and Consumer Products Industries, recommending and implementing proven repeatable concepts, strategies, and software technology that drive down costs and improve operating efficiencies within their customers supply chains. www.nextgeneration.com
