Amenity Health Completes 5 Clinical Trials in 2015 Establishing MedCline™ as an Effective Nighttime Solution for GERD Patients

MedCline™ furthers clinical reach to include PPI-refractory, laryngopharyngeal reflux (LPR), post-esophagectomy and gestational GERD patients providing a much-needed solution for those suffering with nocturnal symptoms.

San Diego, CA (PRWEB) January 18, 2016 -- Furthering its commitment to validate its products with compelling clinical data with top researchers nationwide, Amenity Health has widened the clinical applications for its MedCline™ sleep positioning device to include include PPI-refractory, laryngopharyngeal reflux (LPR), post-esophagectomy and gestational reflux patients. Through 5 clinical trials completed in 2015, MedCline™ has been shown to be an effective treatment for GERD patients suffering with nocturnal reflux symptoms, including heartburn and regurgitation.

Highlights from these studies include:
- 72% reduction in nocturnal GERD symptom scores
- 95% reported an overall improvement in sleep quality
- 75% reported less difficulty with sliding down at night
- 67% reduction in nocturnal regurgitation scores

Abstracts for each of these studies can be viewed at and downloaded from: http://medcline.com/clinical-studies/.

The 2015 clinical trials are added to a growing library of clinical data, including the randomized controlled trial conducted by the Medical University of South Carolina published in the June issue of the Journal of Clinical Gastroenterology, which showed:
- 87% reduction in esophageal acid exposure compared to bed wedges
- 38% reduction in reflux episodes than bed wedges
- Nearly 2x more comfortable than bed wedges

Amenity Health will continue to participate in clinical trials to evaluate MedCline™ with additional patient applications, such as scleroderma and post-lung transplant patients. For more information about MedCline™ clinical trial result, contact Aaron Clark at 858-605-1747.

About MedCline™
MedCline™ is a positional therapy device that provides at-home, on-demand relief of nocturnal acid reflux/GERD. By combining proper upper-body elevation with left-side lateral positioning, MedCline™ provides, clinically proven symptom relief, while protecting the esophagus from damaging esophageal acid. Medcine™ is a Class I Medical Device available by prescription only.
