Based upon these musings, “How the Universe Began: Gods Number 1, 2, and 3” clearly outlines the correlation between science and what is revealed in the Bible.

(PRWEB) September 18, 2017 -- Roy Manish, has completed his new book “How the Universe Began: Gods Number 1, 2, and 3”: a captivating and memorable read that reflects on the mysteries of the Bible. Manish asserts that the Earth has been utilized as fertile grounds by extra-terrestrials to create a culture of experimental clones. An abundance of animal and plant life were transplanted via genetic-code-packaging on a space vessel. As highly intelligent life-forms, such feats were achieved in utilizing the Earth as a biological experiment. It is within the framework of this theory that the author correlates what is found in the Bible.

Roy shares, “From my childhood, I was always a skeptic. A skeptic, in a dictionary’s version, is one who doubts the truth of any doctrine or system: one who doubts the existence of God or revelation. But my skepticism urges me on to find the truth of the matter. So, in this book, I will try to reveal what I believe is the truth of that age-old mystery, the Bible. It’s said a thousand-mile journey starts with the first step, so come with me on an exploration of what is written and my interpretation of the Bible.”

Published by New York City-based Page Publishing, Roy Manish’s thought-provoking exploration into the origin of life and the Bible.
