InventHelp Invention Promotes More Sanitary Toilet Use and Personal Hygiene (MTN-2131)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Hygiene Valet, to applicable companies for their consideration.

PITTSBURGH, PA (PRWEB) September 18, 2017 -- PITTSBURGH...An inventor from Brooklyn, N.Y., believes that everyone should wash their hands before leaving the bathroom, so he came up with an easy, effective and reliable way to remind people to perform that sanitary task every time.

The HYGIENE VALET provides more convenience when using the toilet. It eliminates the need to touch a flush handle, as well as prevents a user from forgetting to wash his or her hands before leaving the bathroom. This allows for sanitary hands and reduces the spread of germs. Ergonomic, easy to use and also producible in a version for urinals, the HYGIENE VALET is suitable for both residential, public and commercial bathrooms.

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-MTN-2131, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
