Corus360 Achieves Cisco Advanced Security Architecture Specialization

*Corus360 has achieved Cisco’s Advanced Security Architecture Specialization, which allows them to provide customers with a wider array of technologies that protect businesses from outside threats.*

Atlanta, GA (PRWEB) September 21, 2017 -- Corus360, a technology-led organization that strives to empower clients through people, technology, and resilience, recently met the criteria to become a holder of Cisco’s Advanced Security Architecture Specialization. This certification signifies that Corus360 has proven their ability to provide sophisticated, value-added Cisco solutions through in-depth sales capabilities, technology skills, and service offerings.

This specialization gives Corus360 unrestricted access to Cisco’s array of security products, opening up new and exciting solutions for clients and providing the company with additional resources to draw on when assisting those in need of improved data protection. It also gives Corus360 access to new and emerging security architectures and solutions, strengthening and growing the company’s security capabilities. Corus360 is more ready than ever to meet the needs of clients looking to stay secure in their efforts to transform their businesses in an expanding digital marketplace.

Cyber security is a constantly changing landscape, and it is vital to remain on top of the fluctuations taking place within it in order to remain safe. Achieving this certification allows Corus360 to access more tools to ensure clients can do just that. With more security threats emerging every day, constant improvements to the architectures that keep businesses secure and running are necessary.

“As our customers look to accelerate their digital strategies, we continue to align and advance our skillsets to allow them to stay secure in today’s competitive environments,” said Frank Ball, Chief Strategist of Infrastructure Strategies at Corus360. “Achieving Cisco’s Advanced Security Specialization aligns with the delivery of our Canopy Architecture that provides application availability through ubiquitous secure mobile access. We have made substantial investments in all of our markets to ensure we can meet the demands of our expanding customer base. This recognition from Cisco is a testament to the dedication and hard work of our pre-sales and engineering teams, who are actively engaged in creating new, easy-to-implement technology solutions that drive business outcomes.”
