Healthpointe Now Offering Chiropractic Care Throughout Southern California

Patients in Irwindale, Garden Grove, and other cities can now benefit from the skilled care of Healthpointe chiropractors.

La Mirada, CA (PRWEB) September 18, 2017 -- Healthpointe is proud to announce that they are offering chiropractic care to patients in Southern California. Patients with chronic back pain, neck pain, muscle spasms, and/or tenderness can seek relief from the highly-skilled techniques and services provided by Healthpointe’s chiropractic department.

Each of Healthpointe’s eleven offices now has a licensed chiropractor that can help create a specific treatment plan for patients’ individual needs.

Healthpointe’s goal is to restore or enhance the function by resolving inflammation and reducing the pain. Healthpointe wants to reduce the use of surgery and often recommends chiropractic care – because it works. Dr. Ismael Silva, Medical Director of Healthpointe, states, “I believe in the results of chiropractic care and I want to take all the right steps in providing patients with the proper healthcare.”

Chiropractors believe that the body is self-healing, and with the adjustments, pain can be relieved and mobility can be regained. There are more than 100 types of adjusting techniques used by chiropractors; each one is specifically designed for a certain ailment.

Among the services that are now available at Healthpointe is spinal manipulation, which is a chiropractic release that involves a high-amplitude and low-velocity thrust. Spinal manipulation, as with most chiropractic services at Healthpointe, is designed for patients with pressure and pain in the lower back. Other great techniques include the Palmer Method and diversified manipulation/adjustment.

Treating with professional chiropractors at Healthpointe can assure patient’s quality care.
