Multifunctional Suitcase Invented by InventHelp Inventor (KSC-1232)

_InventHelp, a leading inventor service company, is working to submit Trips Luggage to companies for their review._

PITTSBURGH, PA (PRWEB) October 09, 2017 -- PITTSBURGH…Travelers traditionally rely on their luggage to provide a convenient carrier of clothing and other essentials needed for the trip. Now, however, an inventor from Independence, Mo., has taken luggage to a whole new level with a number of built-in amenities that increase its functionality.

He developed TRIPS LUGGAGE to provide a holding area for food and beverages while traveling with luggage. Furthermore, it keeps a charging port easily accessible for cell phones and other electronic devices eliminating the need to share a charging station with other travelers. With these added features, it not only enhances travel experiences involving luggage but is also durable, practical and easy to use. At the same time, it affords these appealing new features without increasing bulk or sacrificing luggage space. In addition, it is convenient, effective and affordably priced.

The inventor’s personal experience inspired the idea. “I travel a lot and always see people juggling luggage and beverages that often get knocked over,” he said. “I’ve also noticed crowds gathering around charging stations in airports.”

The original design was submitted to the Kansas City office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-KSC-1232, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
