Easy-Reach Tub and Shower Brush Invented by InventHelp Inventor (NAV-1102)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client’s idea, Bath-Tub-Bristles, in the hopes of a good faith review.

PITTSBURGH, PA (PRWEB) October 09, 2017 -- While many tasks that involve manual labor have been computerized or mechanized over the years, scrubbing tub and shower surfaces still requires considerable physical effort. However, thanks to an inventor from Memphis, Tenn., a less labor intensive option is now available.

She developed BATH-TUB-BRISTLES to provide a fast and easy way to clean a tub and shower. As such, it eliminates the need to bend over or kneel to clean tubs and showers, saving both time and effort. Thus, it improves the productivity of janitorial workers who clean bathrooms and is convenient, effective and affordably priced. Other appealing features are its portability, light weight and durability. In addition, this unique bathroom cleaning tool is drip-free, versatile and easy to use.

The inventor’s personal experience inspired the idea. “I was tired of having to kneel and bend to scrub the tub and shower,” she said. “Since many people have difficulty with their knees and back, I wanted to find a way to get the job done with less effort and strain.”

The original design was submitted to the Nashville office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
