Multi-Purpose Organizational Caddy Invented by InventHelp Inventor (SDB-1036)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Handy Helper, to applicable companies for their consideration.

PITTSBURGH, PA (PRWEB) October 09, 2017 -- Inventors from San Diego, Calif., have developed the HANDY HELPER, a multi-purpose caddy for transporting cleaning supplies, art supplies, tools or other items in an organized and convenient way.

"We were inspired to create an item that would allow us to carry and access a multitude of items without having to bend over," said the inventors. The HANDY HELPER facilitates the organization and transport of a number of items. It provides individuals with convenient access to a multitude of items when needed. This caddy eliminates the hassle of manually carrying multiple items to complete a job or chore. The design of this item helps reduce excessive strain on the back and arms, as well as having to repeatedly bend over to retrieve an item.

The original design was submitted to the San Diego office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SDB-1036, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
