Harris Communications Now Offering Eko Digital Stethoscope, Eko CORE Stethoscope Attachment for Hard of Hearing Clinicians

The Eko Digital Stethoscope and Eko CORE Stethoscope Attachment for hard of hearing clinicians now available at Harris Communications.

EDEN PRAIRIE, Minn. (PRWEB) January 31, 2018 -- Harris Communications, a leading supplier of assistive listening devices for the hard of hearing, is now carrying the Eko Digital Stethoscope and Eko CORE Stethoscope Attachment.

Featuring industry-leading audio amplification and waveform visualization, both products amplify sounds up to 40 times and feature a smartphone app that allows hard-of-hearing clinicians to auscultate with confidence.

Manufactured by Eko Devices, the Eko Digital Stethoscope is a complete cardiology-grade electronic stethoscope with digital and analog capabilities. It includes the Eko CORE attachment that wirelessly pairs to the free Eko mobile app (iOS and Android) for recording, visualization, sharing, and annotation of sounds. An attached analog stethoscope provides added convenience.

The Eko CORE attachment connects to and digitizes the analog stethoscope already owned by clinicians. The Eko CORE attachment pairs via Bluetooth to the free Eko mobile app for recording, visualization, sharing, and annotation of sounds.

The Eko CORE attachment is designed and tested to work with the 3M Littmann Cardiology IV / III / II, 3M Littmann Master Cardiology, 3M Littmann Classic II S.E, 3M Littmann Classic II Pediatric, 3M Littmann Classic II Infant, 3M Littmann Select, WelchAllyn Harvey Elite, Harvey DLX Double-Head, Harvey DLX Triple-Head, ADC 601 lines of analog stethoscopes, Littmann Cardiology III, Littmann Master Cardiology, Littmann Classic II Pediatric, Littmann Classic II Infant, Littmann Classic II S.E., Littmann Select, Littmann Classic III, Littmann Cardiology IV, Welch Allyn Harvey Elite, Harvey DLX Double-Head, Harvey DLX Triple-Head, MDF One Stainless Steel Premium Dual Head Stethoscope, MDF ProCardial C3 Cardiology Titanium Dual Head Stethoscope, MDF One Epoch Titanium Stethoscope, and ADC Adscope 603. The Eko CORE will work with many other stethoscope brands and models, but no performance guarantees are claimed using other models or brands. CORE is not compatible with any digital stethoscopes.

Eko Digital Stethoscope and CORE attachment can be purchased at www.harriscomm.com, or call 1-877-539-7445 (voice) or 952-388-2152 (video phone) to speak with a hearing loss expert.

About Harris Communications, Inc.

Based in Eden Prairie, Minnesota, Harris Communications, Inc. is a leading supplier of assistive products for the Deaf and hard of hearing. Since its founding in 1982 by Dr. Robert Harris, himself a member of the Deaf community, Harris Communications has helped millions of Deaf and hard of hearing customers enjoy their lives to the fullest by providing expert advice and a wide range of more than 2,000 assistive devices and educational resources. The company’s product line includes alerting devices, phone and TV amplifiers, personal amplification systems, tinnitus maskers, books and media and much more. Harris Communications also supplies ADA compliance products and hearing protection equipment.
