CyberSecurity Breakthrough Announces Winners of 2018 Awards Program

Annual Awards Program Recognizes Standout Information Security Companies and Products

LOS ANGELES (PRWEB) September 26, 2018 -- CyberSecurity Breakthrough, an independent organization that recognizes the top companies, technologies and products in the global information security market, today announced the winners of its 2018 awards program. The winning CyberSecurity Breakthrough selections showcase information security technologies and companies that push ingenuity and exemplify the best in cybersecurity technology solutions across the globe.

“2018 has been another banner year for the information security industry as consumers and businesses continue to battle a wide array of complex cyber threats,” said James Johnson, managing director at CyberSecurity Breakthrough. “This year we witnessed a significant amount of industry attention towards reducing liability through regulatory compliance, an emphasis on fraud prevention and an overall focus on improved intelligence and threat management through the application of artificial intelligence and advanced data analytics. We are pleased to see the these trends and the progress of the industry, and we are excited to officially announce our list of 2018 CyberSecurity Breakthrough Award winners. Congratulations to all of the “break through” companies for their well-deserved industry recognition.”

The mission of the CyberSecurity Breakthrough Awards is to honor excellence and recognize the innovation, hard work and success in a range of information security categories, including Cloud Security, Threat Detection, Risk Management, Fraud Prevention, Mobile Security, Email Security and many more. This year’s program attracted more than 3,000 nominations from over 14 different countries throughout the world.

All nominations were evaluated by an independent panel of experts within the information security industry, with the winning products and companies selected based on a variety of criteria, including most innovative and technologically advanced products and services.
