PathSensors Secures 5-year Department of Defense Contract for Building Protection

Baltimore biotech startup PathSensors has secured a $7.2 million contract to provide building protection services to the Department of Defense. The contract extends through 2023.

BALTIMORE (PRWEB) November 20, 2018 -- PathSensors, Inc., a rapidly growing, Baltimore-based biotechnology company focused on delivering pathogen detection solutions, announced today that it has been awarded a $7.2 million contract from the Department of Defense – Washington Headquarters Services to provide CANARY reagents and technical support to Department of Defense Facilities in the National Capital Region. The program includes the manufacture of reagents, equipment support and the development of products for new and emerging threats. The contract extends through 2023.

“We are honored to be of support to such a significant organization,” said Ted Olsen, President and CEO of PathSensors. “We have a longstanding relationship with the Department of Defense and this contract reflects the value of CANARY as an industry leader in bio detection.”

PathSensors has worked in the building security markets since 2007. Most recently, the company has expanded into worldwide food safety and agricultural applications.

About PathSensors
PathSensors is a privately held biotechnology company deploying proprietary CANARY technology, exclusively licensed from MIT-Lincoln Laboratory. PathSensors technology has been designed to detect extremely low levels of biological threats in minutes. Additional information is available at www.PathSensors.com.
