Atagi Plastic Surgery & Skin Aesthetics Now Offering NovaThreads in Lone Tree, CO

Atagi Plastic Surgery & Skin Aesthetics in Lone Tree, CO, has expanded its menu of leading aesthetic treatments to include thread lifts for lifting and rejuvenating the appearance of skin on the face, neck and body without surgery.

LONE TREE, Colo. (PRWEB) November 21, 2018 -- Tanya A. Atagi, MD, is pleased to provide non-surgical skin rejuvenation with NovaThreads®, at Atagi Plastic Surgery & Skin Aesthetics.

The NovaThreads treatment uses dissolvable sutures made of polydioxanone (PDO) threads to rebuild the skin’s natural scaffolding, or underlying support. These sutures, commonly used in some of the most advanced surgical procedures, including cardio-thoracic surgery, are pre-loaded onto hypodermic needles and introduced into the skin’s subdermal level.

NovaThreads enhance and strengthen the skin’s structure and replenish lost volume by stimulating new collagen and elastin growth from deep within. As the PDO threads dissolve over several months, the body responds by triggering its natural healing response for long-lasting, age-defying benefits.

FDA-approved NovaThreads are ideal for smoothing lines and wrinkles on the face, lifting and plumping skin around the mouth, and improving the appearance of jowls with little downtime, minimal discomfort, and no risk of scar tissue.

For more information about thread lifts at Atagi Plastic Surgery & Skin Aesthetics, or to schedule a consultation, please call 303.872.5103.

About Tanya Atagi, MD
Honored by her peers as “Top Doctor” in Denver’s 5280 magazine for several consecutive years, Dr. Tanya Atagi is one of only a handful of board-certified, female plastic surgeons in Colorado. She has built her practice based on a combined passion for medicine and arts, providing a unique yet ideal skill set for a plastic surgeon who is committed to helping patients look and feel their very best.

After completing medical school at Stanford, Dr. Atagi received her plastic surgery training from the Barnes-
Jewish Hospital and Washington University in Saint Louis, followed by specialized fellowship training in Denver. She is board certified by the American Society of Plastic Surgery and has published multiple papers on a wide range of topics including nerve regeneration, implantable medical devices, and breast enhancement and the safety of implants.
