MyNotifi Partners with Comfort Keepers, Offering Emergency Fall Detection to Franchisees

MedHab, the creator of wearable technologies and the MyNotifi fall detection device, announced today a strategic relationship with Comfort Keepers to offer MyNotifi’s automated fall detection devices to the entire network of Comfort Keepers franchisees.

SAN ANGELO, Texas (PRWEB) November 28, 2018 -- MedHab, the creator of wearable technologies and the MyNotifi fall detection device, announced today a strategic relationship with Comfort Keepers to offer MyNotifi’s automated fall detection devices to the entire network of Comfort Keepers franchisees.

As we age, our tendency for a fall increases dramatically. In fact, according to the National Council on Aging, over half of America’s 80+ population will experience a fall each year. Not only are falls dangerous and expensive, but they are also a leading contributor to long-term care for seniors.

MyNotifi is a discreet fall detection wearable either clipped to a belt or worn on the wrist. When a fall is detected, the device automatically alerts the wearer’s customized list of contacts. MyNotifi does not require the wearer to push a button to send out alerts when a fall occurs, however, a push button on the device can summon help at any time.

“When a fall occurs, minutes matter,” said MedHab CEO and MyNotifi creator, Johnny Ross. “MyNotifi will send alerts out to every single participant on the MyNotifi app. We also have built-in strength and range-of-motion exercise videos to help users prevent falls, before they occur.

MyNotifi connects via Bluetooth to the wearer’s smartphone or to the MyNotifi in-home Hub*. If the wearer has a smartphone, the device can detect falls and the location, no matter where the wearer goes. However, MyNotifi also offers an in-home Hub for at home fall detection, designed for those without a smartphone.

When a fall is detected, any designated caregivers or family members can be alerted through the MyNotifi smartphone app. Responders can even see the wearer’s GPS location (smartphone required.)

With MyNotifi, Comfort Keepers clients have an easy way to connect with their families and friends 24/7 and can even support the loved one after a fall or other event occurs.

The MyNotifi device pairs with a free smartphone app, which comes pre-loaded with exercises designed to help with fall prevention. Comfort Keepers offices can use the MyNotifi guided program to help their clients maintain and/or build better strength and range of motion, to remain more mobile and reduce their risk of falling.

*The MyNotifi in-home Hub requires Internet Access

About Medhab

Medhab is a device company specializing in the development and delivery of wearable devices employing remote technology. Established in 2008, Medhab has developed three wearable products specific to three individual markets, including healthcare, wellness, and sports performance. Medhab’s latest technology,
MyNotifi®, is an automatic fall detection device, worn clipped to the belt or on the wrist. It connects directly to the user’s smartphone, and sends a notification, along with the precise GPS location, to a selected list of loved ones or contacts when a fall is detected. MyNotifi may also be used to send a request for help simply by pressing a button on the device. The free MyNotifi smartphone app is pre-set with 38 exercises designed to enhance range of motion of the upper and lower extremities, as well as to increase overall strength, and help prevent falls.
