Stratodesk To Present NoTouch Desktop at Nutanix .NEXT Europe 2018

Stratodesk is excited to announce that its flagship product, NoTouch, now supports Nutanix Frame to bring next-generation endpoint computing and automated management to cloud deployments.

LONDON (PRWEB) November 28, 2018 -- Stratodesk, a Nutanix alliance partner and a leader in end user computing, announced today that it will be hosting a booth at Nutanix’s annual .NEXT Europe conference to give attendees an in-side look at NoTouch Desktop – an endpoint OS and management solution for organizations using Nutanix Frame.

Thanks to the recent partnership with Nutanix, Stratodesk is excited to announce that its flagship product, NoTouch, now supports Nutanix Frame to bring next-generation endpoint computing and automated management to cloud deployments.

“This partnership could not be more timely given the current cloud computing landscape,” said Emanuel Pirker, CEO of Stratodesk. “Stratodesk is a pioneer in delivering cutting-edge products that power and manage VDI endpoints. We’re seeing more businesses look to the cloud for a simple and secure way to deliver virtual apps and desktops. NoTouch fulfills this need, while also providing them with the best and most intuitive OS and management solution for their endpoints.”

.NEXT Conference is the IT industry’s leading datacenter and cloud conference where executives, IT infrastructure and operations leaders, architects, devops practitioners and partners learn and discuss state-of-the-art practices on how to build and run enterprise clouds, on their terms, that provide agility and foster innovation to give businesses a competitive edge. This year’s Europe conference will be held on November 27-29 at ExCeL in London, UK.

About Stratodesk
Stratodesk offers the world’s leading endpoint OS and management solution for X86 and Raspberry Pi. The hardware agnostic, Linux-based software suite is used by government and healthcare organizations, banks, SMBs and large enterprises to eliminate cost and scalability obstacles facing their complex network of devices. By delivering the only management software for mixed environments of x86, ARM and Raspberry Pi devices, Stratodesk is reinventing endpoint computing for enterprise IoT, DaaS, and VDI.
