Innovations w/Ed Begley, Jr. to Focus on Developments in Energy Efficient Power Distribution

DMG Productions explores recent advancements in energy efficient cable bus solutions.

JUPITER, Fla. (PRWEB) November 28, 2018 -- An upcoming episode of Innovations with Ed Begley, Jr. will focus on Superior Bus Solutions, by Superior Tray Systems Inc. This episode is scheduled to broadcast Nationwide, 1Q, 2019. Check your local listings for more information.

This segment of Innovations will explore Superior Tray Systems Inc., leaders in the design and manufacturing of top-quality engineered cable bus and cable tray systems. The show will explore its Cable Bus Solutions, a power distribution system that uses multiple parallel conductors braced in a rigid enclosure. Each conductor is insulated and fully continuous from source to load.

With a wide range of utilities, for both industrial and municipal projects, the Cable Bus is 100 percent maintenance free and has a long service life.

“Superior Tray Systems technology is a long-awaited disruptor in the cable bus industry. It will force the industry to re-think its traditional structure and technological processes, to become nimbler in its response to the rapid changes our society has been undergoing recently. We are very pleased to participate in a show that promotes technological advances, to such a large and varied audience. The Innovations series encourages creativity and entrepreneurship,” said Martin Cox, the lead designer/President of the Superior Tray Systems.

“Engineered to meet the specific requirements of each project, the Superior Bus is more than just a highly efficient power distribution system,” said John Galvin, producer for the Innovations series. “We look forward to highlighting this safe and energy efficient system and to educating audiences about this technology.”

About Superior Tray Systems, Inc.: Superior Tray Systems, Inc. was established in 1996. Since then, it has become a major competitor as an engineering group and fabrication company with state-of-the art equipment.

The company has reinvented the manufacturing of cable bus and cable tray, expanded and developed new product lines. It has all the benefits of an engineer group and fully operational aluminum and steel machining manufacture, reliable contact relationships with suppliers both local and abroad, and a highly trained in-house staff.

With CNC machinery, automated production lines, robotics, and a highly trained team of technical staff of engineers and fabricators, Superior Tray Systems conceptualizes, designs and manufactures engineered power distribution systems of exceptional quality.
