Stuart Steel Protection Named De Nora LIDA® Anode Licensed Distributor

Under the new agreement, Stuart Steel Protection will stock De Nora LIDA impressed current mixed metal oxide (MMO) anodes at their Hiram, GA manufacturing facility, and provide final packaging of the anodes based on customer requirements.

CONCORD, Ohio (PRWEB) January 02, 2019 -- De Nora Tech LLC announces the addition of Stuart Steel Protection as the company’s newest licensed distributor effective December 1, 2018. Under the distribution agreement, Stuart Steel Protection will stock De Nora LIDA impressed current mixed metal oxide (MMO) anodes at their Hiram, GA manufacturing facility, and provide final packaging of the anodes based on customer requirements.

“Stuart Steel Protection is a great addition to our team,” said Helen Dupree, De Nora’s cathodic protection sales manager for the Americas. “Their decades of experience and focus on quality closely match De Nora’s long time mission to supply technology and innovation that give our customers around the world long-term, efficient and cost-effective operation.”

De Nora’s LIDA Anodes complement Stuart Steel Protection’s existing sacrificial anode product line, enabling them to service customers as a complete corrosion control materials company.

“We are honored to join De Nora as a distributor and value-added production partner,” said Gordon Stuart, president and owner of Stuart Steel Protection. “De Nora offers the highest quality MMO anodes in the business, and the ability to directly package them enables us to ensure the highest level of quality control and on time delivery. We can also quickly customize the LIDA Anodes for the customer’s application with respect to different size and lead wire lengths.”

About Stuart Steel Protection
Founded in 1952, family-owned Stuart Steel Protection Corporation has grown to become one of the leading suppliers of corrosion control products in the United States, serving the oil, gas, electric, water, sewer, telecommunications and marine industries. The company offers hundreds of products featuring the latest advances in corrosion control technology to protect a wide range of metallic structures. The company’s product line includes cathodic protection materials, coatings and wraps, electrical isolation equipment, sealing products and related accessories.
