Behavioral Interviews: 500% More Effective—Webinar by AudioSolutionz

This 60-minute live webinar by AudioSolutionz will provide valuable insights on how to evaluate and find better candidates with behavioral interviewing.

DURHAM, N.C. (PRWEB) January 03, 2019 -- AudioSolutionz, a division of audio conference and corporate education leader ProEdTech, will host a 60-minute behavioral interviews training session titled “Behavioral Interviews—500% More Effective Than Traditional Methods” by Bob Verchota on Wednesday, January 23, 2019.

Behavioral interviews have been increasing in popularity with HR professionals and recruiters, and for good reason. A study found that traditional interviewing predicted future employee success only 10 percent of the time, whereas behavioral-based interviewing improved the success rate by over 500 percent. Behavioral interviewing is a technique that leverages the concept that past behavior is the best predictor of future behavior. Companies that are still using traditional interviewing techniques (by focusing on hypothetical questions instead of uncovering the candidate’s real past behavior) need to fix their outdated interview process before it’s too late.

In this behavioral interviews training webinar, human resources and management expert Bob Verchota will show attendees how to increase their success rate and hiring effectiveness. Verchota will share the "SOAR" method for creating behavioral based questions, and show attendees how to uncover the “real” person through 43 behavioral-based questions. He will reveal his top 10 tips for interviewers, along with 15 key competencies that attendees can add to their job descriptions and include in their interviews. He will explain the source of interviewer rater errors, and share a list of 338 useful interview questions to evaluate and find better candidates.

After attending this behavioral interviews training session, attendees will be able to use behavioral interviewing to achieve increased success and effectiveness in hiring, which in turn will increase employee retention and minimize 'turnover'.

Session Highlights

This 60-minute session on behavioral interviews training will cover the following topics:
- The "SOAR" method of creating behavioral interview questions
- 43 tried-and-tested behaviorally-based questions to uncover the "real" person
