World's First Smart Cheesemaker, fromaggio, Debuts at CES 2019

From fresh to aged, hard, soft, lactose-free, kosher, and even vegan, fromaggio can make nearly any type of cheese

NEW YORK (PRWEB) January 04, 2019 -- With new ways for consumers to brew their own beer, grow their own produce, and craft their own clothes, there needs to be a more convenient way to make their own natural, affordable cheese. Fromaggio is the answer consumers have been looking for as an all-in-one, automatic home cheesemaker that can produce a variety of delicious cheeses, easily and efficiently. The team behind fromaggio will be showcasing the innovative cheesemaker at CES on January 8th-11th in Las Vegas prior to the company’s launch on Kickstarter in March of 2019.

Fromaggio puts a factory full of complex and messy cheese equipment into a sleek, easy-to-clean appliance on any kitchen countertop. Users simply pour in milk, cultures and rennet, choose from a default cheese setting or customized their own, and fromaggio automatically handles the rest. The appliance heats the milk, mixes, cuts the curd, drains the whey, and even presses, resulting in the perfect hard or soft cheese.

Processed grocery store cheese is full of additives, and imported cheese in specialty shops is overpriced and not always available. Whether users have a passion for making artisanal foods or they’re just a cheese lover, fromaggio will finally bring consumers the high quality, gourmet cheese that they are increasingly demanding.

This smart cheesemaker has an LCD touchscreen display for easy programming and synchronization with a mobile app via Bluetooth. The app enables users to control the machine, read instructions, order ingredients, share recipes and more.

Founder, Glen Feder, explained, “When I returned to the U.S. after living in France for many years, I asked myself, why don’t we have easy access to wonderfully delicious, affordable, healthy cheese? That’s when the idea of fromaggio came to me. When people see how affordable and easy it is to make delicious, homemade cheese with fromaggio, I think it will be very hard to go back to overpriced imported cheese or bland supermarket cheese.”

Fromaggio will be available to pre-order on Kickstarter in March, but members of the media are welcome to visit fromaggio at FoodTech Live on January 8, 2019, from 6:30 to 9:30 PM PST at Treasure Island, 3300 South Las Vegas Boulevard Las Vegas and at the Enventys Partners’ CES booth #52728 January 8-9th at Eureka Park.

About fromaggio

The fromaggio brand proudly introduces a modern, sleek, easy-to-clean appliance that functions beautifully on a kitchen countertop. Fromaggio is on a mission to change the way the world creates and consumes cheese — a treasured, historic... and one of the most processed foods. The brand’s primary goal is to educate and inspire consumers to make healthy, artisanal quality cheese easily and efficiently in their own home. To learn more, visit https://fromaggio.com.
