Haivision Moves Montreal Headquarters to Accommodate Continued Growth, Advanced Research, and Product Development

Video streaming technology company continues global expansion

MONTREAL (PRWEB) January 24, 2019 -- Haivision, a market leader in video streaming technologies, today announced that the company has moved its Montreal headquarters to its new corporate offices at the Technoparc in Saint-Laurent, QC, expanding to more than 30,000 sq. ft. at their new location.

Across the globe, Haivision video solutions power a wide range of video applications for enterprise, broadcast, house of worship, and defense organizations, including ESPN, LinkedIn, Microsoft, NASA, SAP, Tencent and the United States Department of Defense.

The relocation and expansion of the Montreal headquarters will reinforce Haivision’s mission to deliver the industry’s best video streaming solutions to its customers. To maintain such high standards of quality, Haivision’s new headquarters features expanded space for research and development, customer support, production and an advanced quality assurance lab. Serving the global market, the company has recently expanded its headquarters in Chicago and offices in Hamburg, Germany, and also has regional offices in Portland, Austin, Washington D.C., and Atlanta.

Haivision is a leader in the video streaming industry and pioneered the development of the SRT (Secure Reliable Transport) open source protocol to solve a fundamental challenge – making the public internet a reliable transmission method for high quality, low latency video streams.

“Haivision has, for nearly 15 years, worked to develop leading-edge video solutions for the most demanding applications,” said Mirko Wicha, President and CEO of Haivision. “This move marks a significant milestone for Haivision, as we continue to expand our presence globally.”

Haivision is always looking for great people to join the company. Find out more about working at Haivision here.

About Haivision
Haivision is the leader in live video streaming technologies, providing more than 25,000 organizations globally with video solutions that help them stream broadcast-quality, low-latency video from anywhere. Founded in 2004, Haivision is a profitable, privately held company with headquarters in Montreal and Chicago, and regional offices located throughout North America, Europe and Asia. To help solve the world’s most difficult video streaming challenges, Haivision open sourced its award winning SRT low latency video streaming protocol in 2017 and founded the SRT Alliance, which now has more than 170 industry leading companies supporting this new standard. Awarded the Emmy® for Technology and Engineering from the National Academy of Television Arts and Sciences, Haivision is also recognized as one of the most influential companies in video by Streaming Media and one of the fastest growing companies by Deloitte’s Technology Fast 500.
