DJ Larson Named Chief Operating Officer of National Healthcare Recruitment Firm, Jordan Search Consultants

Company anticipates significant, continued growth in 2019

ST. LOUIS (PRWEB) January 25, 2019 -- After two years in his position as Director of Client Development at Jordan Search Consultants, DJ Larson has been named Chief Operating Officer for the company, effective January 1, 2019. As COO, Larson is responsible for overseeing business development initiatives as well as directing day-to-day operations. Additional duties include leading and managing JSC’s team of eight consultants and associates.

“During his two years as head of business development, DJ has been instrumental in JSC’s growth. He has demonstrated his ability to lead, guide, and mentor the team and has earned their respect,” said Kathy Jordan, CEO and Founder of Jordan Search Consultants. “With DJ as COO, my capacity expands to be able to focus on long-term growth strategies for the company.” In addition to company business development, Kathy Jordan will continue to be involved in day-to-day operations and maintain direct contact with clients.

“I'm excited about this new role and the team we have in place,” says Larson. “I plan to ensure that the infrastructure and processes at Jordan Search Consultants are optimized to keep pace with the ongoing growth of the company, and to continue to expand and create innovative service lines for our clients,” he added. “We also want to significantly increase our presence in targeted geographic regions, including the New England area.”

Jordan Search Consultants was founded in 2003 as a physician and healthcare executive recruitment firm. In August 2012, the company acquired another St. Louis-based search firm to add higher education, academic leadership, and executive-level corporate position sourcing and recruiting to their service offerings. In February of 2014, Jordan Search Consultants acquired a California-based search firm to expand their geographic reach and their capabilities to include recruitment for managed care and health plan physician/nurse leadership, hospice organizations, and non-profit community health centers. Most recently, in June 2017, Jordan Search Consultants increased their national footprint through the acquisition of Health Search New England, a healthcare search firm based in Bangor, Maine.

Kathy Jordan is confident in DJ Larson’s ability to help lead the company. “Under our combined leadership, I anticipate JSC growing 30-40% in 2019,” she shared.
