Virtual Clinical Trials Are Here: What Now?, New Webinar Hosted by Xtalks

Virtual clinical trials offer many advantages such as increasing patient pool, accelerating recruiting and generating more clinically-relevant data, but it’s not always easy to move from traditional trial to virtual. Join this webinar to learn strategies for executing sound virtual trials.

TORONTO (PRWEB) January 24, 2019 -- Virtual or “siteless” clinical trials allow trial coordinators and patients to conduct clinical study visits via online video calls, and collect data via handheld or wearable devices. In addition, virtual trials increase the size and diversity of the patient pool, accelerate recruiting, and generate more informative, clinically-relevant data that is accepted by regulatory agencies.

However, moving from traditional to virtual trials presents challenges as clinical trial sponsors learn how to design, execute, and complete effective virtual trials. To assure success, trial sponsors need to better understand the digital tools and platforms used in virtual trials, how to manage the data collection they enable, and the pitfalls to avoid.

Join Bernard Munos, a pioneering pharmaceutical industry innovator and Founder of InnoThink, and Transparency Life Sciences co-founder Dr. Tomasz Sablinski in a live webinar on Wednesday, February 6, 2019 at 2pm EST (4pm GMT) to hear about an overview of the strategies leaders are finding helpful in adopting and adapting to virtual trials.

They will demystify the process of conducting virtual trials, examine the current state of virtual studies, discuss tools available for conducting virtual trials, and explore how to maximize benefits while reducing the risks of this exciting new approach.

This webinar will help you understand how digital innovation can help improve the productivity of your clinical trials and give you the background you need to decide which trials are virtual-ready and which may be amenable to a hybrid approach. It will also help you develop an overall strategy for designing and executing a virtual trial.

This webinar will appeal to biopharmaceutical researchers, drug developers and CRO professionals as well as those working in clinical trial design, patient engagement and digital health.

ABOUT XTalkS

Xtalks, powered by Honeycomb Worldwide Inc., is a leading provider of educational webinars to the global life science, food and medical device community. Every year thousands of industry practitioners (from life science, food and medical device companies, private & academic research institutions, healthcare centers, etc.) turn to Xtalks for access to quality content. Xtalks helps Life Science professionals stay current with industry developments, trends and regulations. Xtalks webinars also provide perspectives on key issues from top industry thought leaders and service providers.
