Triad HealthCare Network Creates One of the Nation’s Largest Communities of Connected Health Care Providers

A new web-based solution from Proficient Health streamlines referral management by bridging organizational boundaries and previously incompatible systems.

GREENSBORO, N.C. (PRWEB) January 31, 2019 -- Today, Triad HealthCare Network (THN), a physician-led accountable care organization, announced plans to link more than 900 physicians at 300-plus practice locations in a single HIPAA-compliant referral management system designed by Proficient Health.

The new web-based solution bridges the many incompatible technologies and systems used by members of the THN medical community. All practices will be able to communicate quickly and securely online – eliminating the time-consuming process of manually generating the referrals patients need for specialist visits.

Any THN practice can log into the Proficient Health system to initiate, receive and manage referrals. They can select and schedule a provider, share documents, organize and store information for easy retrieval, request follow-up details, generate reports and export information to their medical records platform of choice – all through a simple, easy-to-use interface.

“We expect to save time, streamline and improve care coordination, and make a positive impact on both the patient experience and health outcomes,” says Steve Neorr, chief administrative officer of Triad HealthCare Network. “This system makes it easier for all the physicians in our network to share information quickly and easily, while complying with rigorous HIPAA security requirements.”

About Triad HealthCare Network

Triad HealthCare Network (THN) is a provider-led accountable care organization (ACO) consists of community physicians, Cone Health and its physicians and hospitals, and other providers who together provide higher quality, better-coordinated and more efficient care for patients. THN improves the quality and value of health care in the Piedmont Triad by focusing on preventive care, improving communication and data flow among providers, and by providing innovative services. THN is a subsidiary of Cone Health and is governed and operated by a board of managers and a physician-led operating committee. For more information, visit http://triadhealthcarenetwork.com.
