Cytellix Partners with OCTANe to Offer Standards-Based Cybersecurity Services to Partners

Leading Cybersecurity Managed Service Provider Delivers Services Amid Ever-Changing Compliance Regulations

ALISO VIEJO, Calif. (PRWEB) January 30, 2019 -- Cytellix— the cybersecurity division of Information Management Resources, Inc. (IMRI), an industry standards-based, managed cybersecurity service provider—is pleased to announce a strategic partnership with OCTANe to deliver Cytellix’s Managed Services to assist organizations with improving cybersecurity processes affordably to comply with industry standards and reduce attack surfaces.

A turnkey solution, Cytellix’s managed cybersecurity services bring complete cyber assessment, vulnerability scanning, continuous cybersecurity monitoring, Security Information and Event Management (SIEM) as a Service, remediation best practices and a plan of action as an annual subscription. Through the new partnership with OCTANe, these services will be offered directly to Growth Services Program members.

“We are proud to be teaming up with OCTANe and its robust network for this partnership. The collaboration is a win for everyone involved,” said Cytellix executive vice president of commercial cybersecurity, Brian Berger. “In addition to cost savings, OCTANe Growth Services Program members will receive premier cybersecurity services from Cytellix.”

"The Cytellix Federal business, provides cybersecurity services that include complete visibility and situational awareness for the US Army. OCTANe is happy to have them offer these vetted services, under the Cytellix brand, to our members of our growth services platform,” said Bill Carpou, OCTANe’s CEO.

ABOUT CYTELLIX: Cytellix, the cybersecurity division of Information Management Resources, Inc. (IMRI), is an industry-standards-based, managed cybersecurity service provider, specializing in proactive behavioral analytics and situational awareness of an organization’s cyber posture. Cytellix has created an affordable outsourced solution for small- and mid-size businesses (SMBs) – which have become one of the largest targets of cyberattacks in recent years – and its solutions have monitored over 7 million devices thus far. Its best-in-class, turnkey service was designed to help SMBs in government, manufacturing, technology, finance, banking, law, healthcare and higher education sectors take a proactive, low-friction approach to securing their environment. Cytellix has not only successfully secured the network perimeters for the U.S. Army, Missile Defense Agency and municipal organizations, but its proactive solution has also been deployed at leading
corporations, including: PricewaterhouseCoopers, Kaiser Permanente and the Walt Disney Company. The Company has been recognized with numerous honors such as the 2018 American Business Award, Top 10 Fastest Growing Managed Service Provider, the 2016 Small Business Administration Person of the Year award, the 2015 Patriot Award and the 2014 White House Champion of Change Honor; and its experts are frequently tapped for media interviews and keynote addresses by publications such as CNET and The Huffington Post.
