NetActuate Boosts APAC Presence with New Datacenter in Singapore

NetActuate recently increased their managed infrastructure capacity and global network reach with a new datacenter deployment in Singapore.

RALEIGH, N.C. (PRWEB) February 01, 2019 -- In response to increasing demand for managed network and infrastructure services in the Asia market, NetActuate announces the launch of services from a new datacenter location in Singapore. This new location will increase the availability of cloud and bare metal infrastructure, and boost NetActuate’s global network reach and reliability.

“As we work with an increasing number of businesses and service providers that need a truly global footprint, it is important for us to expand our capacity and improve our network performance and reliability in the APAC region,” said Mark Mahle, CEO and Principal Technology Architect of NetActuate.

For businesses seeking a reliable, low-latency APAC presence, NetActuate provides managed network and infrastructure services from this new Singapore location, as well as Tokyo, Hong Kong, Chennai, and Sydney. To deliver their applications across APAC and around the world, businesses can leverage NetActuate’s anycast-optimized platform, available from this and more than 30 additional locations worldwide.

This new location is one of the most network-dense datacenters in Singapore, housing many of the international and regional networks connecting South Asia. The facility is certified compliant for ISO 27001, PCI DSS, SOC 1 Type 2, SOC 2 Type 2, SS 564, and was specifically designed to meet the stringent safety and data security guidelines of the Monetary Authority of Singapore (MAS). Customers can leverage NetActuate’s cross-border expertise in shipping and customs for managed colocation deployments.

To learn more about NetActuate’s services from Singapore, please schedule a call with a solution specialist by calling 1-800-419-2656 or visiting netactuate.com.
