Lutronic Genius™ Intelligent RF Delivery Platform Cleared in the USA

A new paradigm in Radiofrequency (RF) energy delivery, the system features proprietary technology for customized, comfortable treatments

BOSTON (PRWEB) February 07, 2019 -- Lutronic, a top-tier global business focused on developing intelligent energy-based medical devices, announces the US FDA clearance of the Lutronic Genius™ platform.

This revolutionary medical device, based upon Lutronic’s seven-year leadership in radiofrequency microneedling, transmits energy more precisely into the skin. To develop the ideal platform to harness the full potential of RF microneedling uniquely, Lutronic invested countless hours of research, development, clinical trials, and laboratory testing.

The Lutronic Intelligent Care™ products incorporate “smart” features to help practitioners provide outstanding care.

- “The Genius system is the best system that Lutronic has come up with,” shared E. Victor Ross, M.D., Director Laser and Cosmetic Center at Scripps Clinic San Diego, CA. “It has a quiet motor, a more ergonomically friendly handpiece, and it also has real-time feedback. The intelligent interrogation of the skin allows you to be assured that you are precisely delivering the energy that you intended at your chosen depth.”

The “genius” is in the innovation:

- The system’s sophisticated sensing and feedback algorithms provide novel real-time feedback to deliver more consistent energy during the treatment.
  - Treatments can be optimized for age, skin type, sun exposure habits, anatomical area, tissue thickness and depth, and other variables.
  - The neocollagenesis and neoeLASTinogenesis resulting from a Genius treatment can lead to healthier tissue and desired patient outcomes.

“Genius is our newest flagship device in our suite of Lutronic Intelligent Care systems which are optimized for the perfect combination of comfort, recovery, and outcomes,” stated Lee Pannell, COO of Lutronic Global. “Furthermore, we are excited about the collaboration between our Korean and USA teams which has yielded our first system to be assembled in the USA.”

About Lutronic Corp.
Effective. Innovative. Intuitive. Dependable. These four core tenants fuel Lutronic’s development of intelligent laser and energy-based systems. Their robust products include proprietary features to help optimize care in aesthetic, ophthalmic, spinal, and surgical procedures. Committed to this mission, Lutronic partners with key opinion leaders to advance scientific efficacy of Lutronic’s systems. To develop unrivaled systems with “smart” features, Lutronic devotes as much as four times what competitors invest in research and development, resulting in more than 535 current and pending patents worldwide.
In addition to operations and manufacturing in the Boston area, Lutronic has a major manufacturing and research center in South Korea, offices in Germany, France, China, and Japan, and a worldwide network of direct sales teams and distributors which is ever expanding.

Important Safety Information
The Lutronic Genius™ radiofrequency system is intended for use in dermatologic and general surgical procedures for electrocoagulation and hemostasis. The Lutronic Genius is not appropriate for patients with certain medical contraindications. For detailed benefit and risk information, please consult your practitioner.

Forward-Looking Statements
This news release may contain forward-looking information that involves risks and uncertainties, including statements about the use of Lutronic products. There can be no assurance these products will achieve the benefits described herein or that such benefits will be replicated in any particular manner with respect to an individual patient, as the actual effect of the use of the products can only be determined on a case-by-case basis. In addition, there can be no assurance that these products will be commercially successful or achieve any expected level of sales. Lutronic expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any such statements presented herein to reflect any change in expectations or any change in events, conditions or circumstances on which any such data or statements are based.

This information is not intended as a product solicitation or promotion where such activities are prohibited. For specific information on what products are available for sale in a particular country, please contact a local Lutronic sales representative or write to contact@lutronic.com.
