Bonnot Rolls Out New Lab Extruder

Bonnot’s new ETP 1 Lab Extruder provides a compact, robust, & feature rich machine for the R&D lab

AKRON, Ohio (PRWEB) February 14, 2019 -- Bonnot officially launched its new ETP 1 Lab Extruder (https://www.thebonnotco.com/extruders/laboratory-extruder/) to an emphatic applause from its customers. The new ETP 1 Lab Extruder provides smooth material ingestion, easy feeding and high versatility; along with quick release components reducing time between trials. The Extruder comes equipped with easy to use, intuitive touch screen controls to effortlessly process countless materials like powders, clay, mastics, catalysts, food stuff and many more. The Extruder is small and compact, but is still robust to handle the toughest processing challenges.

When asked about how the new ETP 1 Lab Extruder will help Bonnot customers George W. Bain III (V.P. of Operations) responded: “The new ETP 1 Lab Extruder will allow customers to easily feed and extrude a diverse group of materials; while precisely controlling and monitoring the process. The extruder is compact, but offers quite a bit of torque for those drier formulations. While the ETP 1 Lab Extruder has some great standard technical features Bonnot can always customize the machine to fit specific needs; such as higher L/D ratio, higher RPM, higher torque, and countless screw geometries. Probably one of the best attributes of the ETP 1 Lab Extruder is its scalability so our customer’s can mitigate risk as they commercialize new products and processes.”

The ETP 1 Lab Extruder is now available for purchase. Please don’t hesitate to contact Bonnot at info(at)thebonnotco.com or 330-896-6544 for more information or check out our website at www.thebonnotco.com.

The Bonnot Company has excelled in the design, engineering, and manufacturing of exceptional extruders, bulk feeders, custom cutters, and more. Our extrusion equipment allows customers to streamline their processes for increased efficiency, productivity, and reliability. As a global leader in reliable extruding equipment, engineering, and consulting for customers in a variety of industries, Bonnot consistently pursues the most advanced and up-to-date technology available. The years may come and go, but our commitment to our customers remains as strong and powerful as our beginning. With each new idea and innovation in extrusion, we are blazing a new path to a stronger future. While our focus is on the manufacturing of top-of-the-line extruder machines, bulk feeders, and custom cutting machines, we also provide a range of global services including consulting and equipment leasing. No matter what your need for in extrusion, Bonnot is on standby to help
