Ranger Point Precision Offers New Henry Repeating Arms Parts: Hammer Spur Extensions and RHINO Picatinny Rails

*Ranger Point Precision adds to its line-up of Henry Repeating Arms performance parts with new hammer spur extensions and RHINO picatinny scope mount rails. This adds to its other popular products including: Cloverleaf fiber optic peep sights, fiber optic front sights, lever quick takedown screws and shims, dovetail fillers and more.*

CYPRESS, Texas (PRWEB) February 21, 2019 -- Ranger Point Precision has expanded its performance parts offerings for Henry Repeating Arms lever-action rifles to include new hammer spur extensions and RHINO picatinny scope mount rails.

**RHINO Picatinny Rails**

Designed from the receiver up, these low-profile scope mount rails offer improved bore-to-optic positioning and eliminate movement for better accuracy even under the harshest recoil of a big bore rifle.

They are available for Henry Repeating Arms All Weather and Classic models chambered in 30-30, 45-70; the Big Boy Steel rifles chambered in .44 Mag/Spl, .45 Colt, .357 Mag/.38 Spl; the Henry Long Ranger rifles chambered in .223 Rem/5.56 NATO, .243 Win, .308 Win, 6.5 Creedmoor.

- Compatible with most picatinny and weaver rings and dovetail mounted sights
- Low heights of .26" and .35" and available in two lengths 5" receiver flush and 6" longer
- Better alignment than two-piece mounts
- Contoured bottom and 10 MOA machined for more elevation flexibility
- Made from strong-as-steel anodized 7075 aluminum for light weight and rust-proof lifetime
- 2X the recoil lug contact improves accuracy by eliminating scope movement under the harshest recoil
- A set of four self-centering T15 Torx drive screws resist cam-out and offer the most stable and repeatable bond between rail and receiver

**Hammer Spur Extensions**

If you run a scope on your Henry lever-action rifle, you'll easily be able to cock the hammer and love the secure hammer control these beauties afford with their thumb curvature and diamond checkering.

**Features:**
- 1/8" longer extension than most, for plenty of purchase
- Compound curvature to better match the user's thumb
- Deep diamond checkering for secure, non-slip operation
- Ultra light design for minimal influence on lock time
- Rounded edges and corners for painless use
- Ambidextrous attachment for right handers or left handers
- CNC machined from 6061 aluminum and hard anodized (clear or black)

**About Ranger Point Precision**
