Advantage Engineering Inc. Sees Flood of New Orders For It’s P-Pod Collapsible Portable Restroom at Water and Wastewater Equipment, Treatment and Transport Show 2019

Advantage Engineering Inc. is showcasing its next-generation, collapsible and stackable P-Pod at WWETT 2019 Show booth number 1001 to be held at the Indiana Convention Center, February 21-23.

INDIANAPOLIS (PRWEB) February 22, 2019 -- Advantage Engineering Inc. founder and CEO, Steve Hengsperger, today unveiled his company’s next generation P-Pod portable restroom at WWETT 2019. As the only ‘pop-up’ portable product available on the market – the P-Pod collapses into a cube that is one third of the height of conventional portable restrooms and can be stacked three high.

The P-Pod also features a removable 40 gallon waste tank, and can be locked down in its collapsed state when not in use to eliminate vandalism and misuse when not deployed. In spite of its innovative design and functionality, the P-Pod weighs and costs roughly the same as conventional models.

These unique and significant innovations mean that operators can transport their P-Pods in one third of the time and stack and store them with one third of the footprint, resulting in major savings on trucking, fuel, labor and storage costs.

“We’ve exceeded our highest expectations at this year’s WWETT Show,” said Davis Gravelsins, Director of Marketing. “So we’re very fortunate to have our own P-Pod manufacturing facility, with excess production capacity to handle higher demand and larger orders, like the ones we are getting from WWETT 2019 attendees.

“As the biggest time and money saving innovation since the portable plastic restroom made its debut decades ago, we are really turning heads and taking orders,” adds Mr. Hengsperger. “I’m amazed at how many folks not only stop, look and listen to our P-Pod pitch, but also take videos with their smartphones while we demo our product.”

The P-Pod may be seen at WWETT 2019 Booth Number 1001 at the Indiana Convention Center:
WWETT 2019
Indiana Convention Center & Lucas Oil Stadium
100 South Capitol Avenue
Indianapolis IN
February 21 – 23, 2019
