zSpace is Gold Winner for 2019 Edison Awards in Edutech Category for New AR/VR Laptop

zSpace announces it has been named a gold award winner for this year’s Edison Awards in the Living, Working And Learning Environments’ Edutech category for its all new AR/VR Laptop

SUNNYVALE, Calif. (PRWEB) April 10, 2019 -- zSpace, makers of innovative computing solutions designed to power the global delivery of spatial content, is excited to announce it has been named a gold award winner for this year’s Edison Awards in the Living, Working And Learning Environments’ Edutech category for its all new AR/VR Laptop. The Edison Awards, named after Thomas Alva Edison, recognizes and honors the world’s best in innovators and innovations.

zSpace technology, as found in the company’s all-new laptop PC, breaks the screen barrier between users and AR/VR content by creating a multi-dimensional environment that leaps out of the screen. Featuring 3D screen technology, headtracking glasses and an interactive stylus, the zSpace laptop PC fosters creativity, collaboration and education by allowing users to interact with AR/VR content in a more flexible and immersive environment that doesn’t hinder spatial awareness.

Dedicated to making learning fun through life-like, hands-on augmented reality and virtual reality applications, zSpace products are currently in use by more than 1,000 school districts, technical centers, medical schools and universities around the world. Millions of learners have experienced zSpace, and no other platform combines the familiarity of a traditional laptop form factor with the immersive nature of AR/VR.

All nominations were reviewed by the Edison Awards Steering Committee and the final ballot sent to an independent judging panel. The judging panel was comprised of more than 3,000 professionals from the fields of product development, design, engineering, science, marketing and education, including professional organizations representing a wide variety of industries and disciplines.
