Zen Nutrients Helps Combat Opioid Crisis by Offering Financial Assistance for All-Natural Pain Supplements

*Zen Nutrients is offering supplement assistance for their entire, all-natural product line, including VitaBack which assists with back and neck pain.*

NEW PORT RICHEY, Fla. (PRWEB) April 11, 2019 -- Zen Nutrients, a visionary leader in Condition Targeted Nutraceuticals™ (CTNs), is excited to announce their efforts to help decrease opioid abuse by offering over-the-counter vitamin and supplement assistance to qualified individuals. Supplements will be available at no charge or a discounted rate, up to 50% off.

In 2019, Zen Nutrients committed to donate up to $50,000 in product inventory to help patients needing financial assistance, especially for pain management therapy. One of their most popular products, Zen Nutrients’s all-natural back and neck pain supplement, VitaBack®, is helping thousands of patients reduce and deter the use of narcotic pain medications.

Zen Nutrients's financial assistance program is unique and rarely offered in the vitamin and supplement industry. Interested customers should visit [www.zennutrients.com](http://www.zennutrients.com) and complete a quick questionnaire on the “Need Help Link”. Each request is subject to approval and fulfillment based on current available resources.

"We are very proud to give back to our community and provide patients with Condition Targeted Nutraceuticals™ (CTN’s). The reality is that vitamins and supplements are not covered by most insurance plans and it’s quite expensive for customers to pay for high quality supplements that actually work," said Devan Patel, Zen Nutrients’s president.

Zen Nutrients developed VitaBack®, the first and most comprehensive nutraceutical for chronic back and neck pain, after countless hours of research and working with clinical pharmacists and pain management physicians.

“I personally witnessed tragedies caused by the opioid epidemic and realized a drastic change needed to occur,” said Nick Petrillo, Senior Medical Science Liaison of Zen Nutrients. “There are still high amounts of opioid referrals going on and providers have little to no help with insurance plans covering other therapies to reduce the number of daily opioid referrals.”

VitaBack® has 19 researched-backed, all-natural, gluten- and GMO- free ingredients to assist with chronic pain and inflammation*. Customers can feel safe knowing all Zen Nutrient nutraceuticals are made in compliance with the FDA’s Current Good Manufacturing Practice (CGMP) regulations. “Think of it as an amazing one a day vitamin, for back & neck pain,” said Petrillo.

Zen Nutrients products are available through the company website and through select physicians. Products are also available on Nutrivivo, an innovative software platform that helps patients achieve their health goals better, safer and faster.

“Patients using Nutrivivo can benefit from more effective and more personalized supplement advice from their doctor or pharmacist, especially when it comes to pain management,” says Chris Jenkins, CVP of Strategy at Nutrivivo.
Zen Nutrients provides financial assistance for their entire product line, which also offers supplements that assist with cancer support, foot and ankle pain, diabetic neuropathy, surgery recovery, as well as scar and wound healing. For additional information on products and clinical research visit www.zennutrients.com or email support(at)zennutrients.com.
