Dr. Arta Farahmand to Host Peri-Implantitis Study Club in Torrance, CA

Dr. Arta Farahmand, periodontist in Torrance, CA, hosts the next Perio-Hygiene Study Club for area professionals to learn more about diagnosing and resolving peri-implantitis.

Torrance, CA (PRWEB) April 30, 2019 -- Dr. Arta Farahmand, a well-regarded periodontist in Torrance, CA, is hosting the next Perio-Hygiene Study Club event on May 15, 2019. This course is focused on detecting, diagnosing and treating peri-implantitis diseases through a program of systematic, proven dental implant maintenance. Geared toward hygienists, this four-part series provides attendees with two continuing education credits.

Though applicable to all practicing dental providers, this series will concentrate heavily on the roles hygienists play in stopping periodontal conditions like peri-implantitis before they begin, as well as treating them using innovative techniques. As with all the study club sessions, this one will include time to work through diagnoses, talk about objectives, discuss minimally invasive solutions, visualize and sequence procedures, and address the inter-connection between oral health and overall health.

Peri-implantitis occurs when bacteria build up and infect the periodontal pockets formed between the dental implant and surrounding gum tissues. Symptoms of peri-implantitis include swelling or bleeding of the tissue around the implant, gum sensitivity, and implant mobility and exposure. Without intervention and immediate treatment, peri-implantitis can lead to extensive soft tissue and bone loss, drastically increasing the risk for the loss of the dental implant. If the dental implant must be removed, the site may take months to heal before another dental implant can be placed.

As a respected periodontist, Dr. Farahmand offers peri-implantitis treatment with her team at her periodontal practice in Torrance, CA. She also offers other forms of restorative and periodontal services for patients from around the region. She will be leading the May session of the study club.

Those interested in attending this event or any of the following events in this series can call 424-488-7500 for more information. Individuals who suspect that they may have peri-implantitis should be evaluated as soon as possible. Adults may self-refer to Dr. Farahmand by visiting www.periodentalimplants.com.

About the Periodontist

Dr. Arta Farahmand is an experienced periodontist serving the Torrance, CA area. With knowledge, skill, and dedication, Dr. Farahmand has made it her life’s goal to help people look and feel better.
