Phytocéane Introduces Age Solution Firming Cream with Organic Wakame

_Naturally firm the skin with organic Wakame, a seaweed that boost the skin’s collagen and elastin production._

SAINT-MALO, France (PRWEB) May 06, 2019 -- Phytocéane introduces an innovative active ingredient in a highly effective formula to deeply firm and replenish the skin. Organic Wakame, a brown micro-seaweed grown and handpicked in Saint-Malo, stimulates the synthesis of elastin, collagen, and fibrilllin, and enhances the dermal-epidermal cohesion resulting in _firmer and more toned skin_. Organic Wakame works in synergy with two natural complementary active ingredients: Chlorella, which restructures the skin thanks to its natural pro-collagen peptide, and ultra hydrating Jania Rubens, a nutrient rich, red vegetal coral. The skin becomes firmed, restructured and lifted with a feeling of comfort in a natural and non-comedogenic formula that leaves a velvety finish.

Age Solution Firming Cream with Organic Wakame 50 ml, suggested retail price: $77.00

Directions for use: Morning and evening, massage over a perfectly cleansed face and neck with upward movements.

Key ingredients:
- **Organic Wakame** - a collagen boosting detoxifying brown micro-seaweed that is popular in Asia as a superfood.
- **Chlorella** - a green micro-seaweed that deeply firms and restructures the skin.
- **Jania Rubens** - a red seaweed with a vegetal coral structure that replenishes the skin with water.

**CLINICAL RESULTS:**
**AFTER 1 MONTH:**
SKIN IS 2 X MORE: plump, elastic, firmed and toned*
FIRMING:
The tissue of the jawline is redesigned: 91%*
