Fleur’s USA Announces the Launch of It's Newest Exfoliant: Intense Exfoliating Cream

This creamy facial scrub is sprinkled with exfoliating particles and enriched with protective hibiscus oil.

SAINT-MALO, France (PRWEB) May 05, 2019 -- Fleur’s USA Announces the Launch of it's New Intense Exfoliating Cream

Reveal new, petal-soft skin with Fleur's newly launched Intense Exfoliating Cream, a powerful exfoliant with fine and ultra-effective natural scrubbing particles. Kaolin gently absorbs impurities to reveal a radiant complexion, while silica works to deeply exfoliate and unclog pores. Hibiscus oil nourishes and strengthens the skin barrier for a smooth, protected complexion. A refreshing bouquet of floral and fruity scents leaves a light fragrant essence on the skin.

Intense Exfoliating Cream..............50 ml, suggested retail price $44.00

Directions for use: twice a week, apply a small amount of product to clean, dry skin of the face and neck, avoiding the eye contour. Exfoliate with circular movements and then rinse with water.

Key ingredients:
• Kaolin - absorbs excess sebum like a sponge, while peeling impurities and toxins off of the surface of the skin.
• Silica - mechanical exfoliant with medium granulometry for a complexion smoothing effect.
• Hibiscus Oil - rich in essential fatty acids to protect the skin’s moisture barrier while limiting water loss.
