HPC Announces Lifetime Warranty on Fire Features

HPC Reinforces Company’s Commitment to Safety and Quality

DAYTON, Ohio (PRWEB) May 13, 2019 -- HPC, the world’s leading manufacturer of CSA-certified fire and water features, recently announced it is implementing a Lifetime Warranty on its fire pit burners. This new warranty policy goes into effect May 1, 2019, and applies to the entire line of fire pit burners, including the popular and patented Penta Burner.

This new warranty policy, which covers both residential and commercial installations, is part of HPC’s emphasis on safety, innovation and quality. “Our customers expect the best and the safest fire features from HPC,” commented HPC Chief Operating Officer Sean Steimle, “so it’s up to us to continue to set the standard.” This Lifetime Warranty policy is one way for us to back up our promise of safety and quality.” While this Lifetime Warranty covers the burner, which is the main component of any fire pit, it offers shorter ranges of coverage for other components, such as electronics and gas lines.

HPC, based in Dayton, Ohio, is the leading manufacturer of gas fire features and fire-and-water features for residential and commercial applications. Its products are available through hundreds of specialty retailers and select online merchants. HPC – Fire Inspired – www.hpcfire.com
