Tata & Howard, Inc. Encourages Getting to Know Local H20 During Drinking Water Week

Drinking Water Week recognizes the critical role drinking water plays in our daily lives. Learn about and protect the source of your drinking water.

MARLBOROUGH, Mass. (PRWEB) May 09, 2019 -- As Drinking Water Week continues, Tata & Howard joins the American Water Works Association and water professionals across North America in encouraging water consumers to get to know their local H2O.

Finding information about local water is simple. As required by the Safe Drinking Water Act, water utilities must provide customers with an annual water quality report, also called a Consumer Confidence Report (CCR). A CCR identifies the quality of local drinking water and if any contaminants are detected and if so, which ones. Also available in the report is information on a community’s local source for drinking water. The city of Marlborough, MA, home to Tata & Howard’s headquarters, uses an average of 4 million gallons of water a day. Currently, 100 percent of the water is supplied by the Massachusetts Water Resources Authority (MWRA).

Additionally, information on local source water is available through the U.S. Environmental Protection Agency’s “How’s My Waterway?”

"As engineers in the water space, water is at the heart of everything we do," said Tata & Howard Co-President, Karen Gracey, P.E. “Knowing the source of our water and keeping it clean is critical and we hope Drinking Water Week will serve as an opportunity for everyone to learn more about this vital piece of our daily lives.”

More information about local water sources is available on DrinkTap.org.

About Drinking Water Week
For more than 40 years, AWWA and its members have celebrated Drinking Water Week, a unique opportunity for both water professionals and the communities they serve to join together in recognizing the vital role water plays in daily lives. Additional information about Drinking Water Week, including free materials for download and celebration ideas, is available on the Drinking Water Week webpage.
