New Book Reveals Various Forms of Deception Used to Gain Political Advantage

Anthony Todd Arnold announces publication of ‘Hoodwinked’

LANSING, Ill. (PRWEB) May 09, 2019 -- Anthony Todd Arnold describes how Donald Trump’s racist agenda has driven his career and asks readers to re-evaluate how they see themselves and those closest to them in his new true crime book, “Hoodwinked: An American Tragedy in the Era of Donald J. Trump” (published by Archway Publishing).

The author’s sole purpose of writing his book is to educate the reader about how easy it is to be deceived when a person, a group or a government decides to lie, to alter the facts or to provide a false narrative to gain the advantage for a given purpose. Specifically, to change the way a person thinks about someone or something without that person realizing their thinking changed.

“The American people, as well as people all over the world realize that ‘lying’ has become too fashionable, and acceptable as the new ‘normal,’” Arnold says. “My book explains to the reader how the American discourse wasn’t created in a vacuum; instead it details the reasons why so many current issues aren’t resolved.”
