DentalXChange Attachment Service Surpasses 2 Million Attachments Processed

*Milestone reached in under 2 years of service making it the fastest growing attachment service in the industry*

IRVINE, Calif. (PRWEB) May 13, 2019 -- DentalXChange, the creator of industry-leading electronic claims software, ClaimConnect, is proud to announce that DentalXChange Attachment Service has surpassed the two million claim attachments processed milestone.

The achievement was reached in less than two years of service and shows how the dental industry has embraced the new system, according to Scott Wellwood, President of DentalXChange.

“By reaching the two million attachments processed milestone, we see that our clients are experiencing the value we set out to create,” explained Scott Wellwood, President of DentalXChange. “We are excited to see the impact our service is creating with so many providers adopting this innovative technology in such a short period of time.”

DentalXChange Attachment Service is fully integrated into the ClaimConnect application and allows dental providers to attach supporting documents such as x-rays, periodontal charts, EOBs, narratives or any other documentation that may be required by dental insurance companies to adjudicate a claim, without having to open a separate program or mail hard copy documents or films.

“The feedback we have received from payers and providers has been overwhelmingly positive,” says Wellwood. “Providers have found that having a single software application for creating claims and attaching documents has improved their practice’s efficiency and has increased cost savings.”

“With connections to most major Payers, DentalXChange Attachment Service has enjoyed tremendous acceptance among the provider community. We continue to work with additional Payers to help them realize the unique features and benefits of using this service and our list is rapidly growing. We encourage anyone interested in streamlining the attachment process to visit www.dentalxchange.com,” Wellwood continued.

Other Features of DentalXChange Attachment Service:

- **System Notifications**
  Alerts notify the user when an attachment is required, increasing speed and reducing errors on the provider’s side, which in turn decreases denials and follow-up time with insurance companies.

- **Optimized Image Tools**
  DentalXChange’s attachment software offers highly functional image tools including high-quality image resolution, and the ability to rotate, zoom, and change image brightness and contrast to better examine attachments.

- **Fully Customizable Platform**
  The attachment service can be customized and integrated into Practice Management Systems, delivering flexibility to personalize the software as needed.

PRWeb ebooks - Another [online visibility tool from PRWeb](https://www.prweb.com)
• Secure Archive
Payers and providers can view submitted claims and attachments in a secure online archive at any time.

• Low Cost, Contract-Free Structure
DentalXChange’s attachment service does not require a contract. Providers have the flexibility to sign up for the service on a monthly basis. While many attachment services charge users upwards of $450 annually, DentalXChange offers its attachment service at a price of $25 per month ($300 annually) with no annual maintenance fee.

About DentalXChange
Since 1989, DentalXChange has earned industry-wide acclaim and recognition for pioneering the web-based dental EDI solutions industry. Today, it has grown to support a current client base of over 41,000 dental healthcare offices. Headquartered in Irvine, CA, DentalXChange accounts for more than $4 billion in dental claims annually. Through its own clearinghouse and secure web portals, the company processes nearly 69 million EDI transactions, consisting of more than 41 million dental claims annually.
