Healthcare Webinar: How Prevea Health Is Modernizing Patient Access

*Prevea Health and DocASAP will discuss how to create an access optimization strategy to drive measurable results for health systems and physician groups across the U.S.*

HERNDON, Va. (PRWEB) May 10, 2019 -- WHAT:
Frictionless patient access is critical for closing care gaps, reducing costs and improving the patient experience. For many health systems and physician groups, however, access is limited to traditional channels. These access challenges translate into issues that impact patients, providers and healthcare organizations.

[DocASAP](https://www.docasap.com), the industry’s most advanced patient access and engagement platform for health systems, health plans and physician groups, along with Prevea Health, an integrated multi-specialty group, will present a webinar titled “How Prevea Health is Modernizing Patient Access.” Prevea Health will share how they created an access optimization strategy that modernized and broadened patient access through online scheduling, driving measurable results for same-week visits, reducing no shows, creating call center efficiencies and attracting new patients.

The free, 60-minute webinar will address:
- How to identify the key patient access channels for ‘modernized access’
- Meaningful access, scheduling and engagement metrics to focus on
- How to design access initiatives with provider needs in mind
- How payer-provider collaboration can enhance patient access

WHEN & WHERE:
Webinar: “How Prevea Health is Modernizing Patient Access”
Thursday, May 16, 1:00 p.m. – 2:00 p.m. ET
