Expanded Offering Brings Powerful iCONECT Solutions to Government Sector

eDiscovery, governance and GDPR compliance software platform Heureka, is now available to the public sector within the iCONECT GSA listing on immixGroup’s NASA SEWP and GSA IT Schedule 70 contracts.

SAN FRANCISCO (PRWEB) August 28, 2019 -- iCONECT, a digital document archiving platform company, today announced an expansion to its existing relationship with immixGroup, an Arrow company that helps technology companies do business with the government. eDiscovery, governance and GDPR compliance software platform Heureka, is now available to the public sector within the iCONECT listing on immixGroup’s NASA SEWP and GSA IT Schedule 70 contracts.

“We are pleased to continue to expand our offerings with immixGroup, a trusted value-added distributor of IT products and services to the broad government ecosystem,” stated Ian Campbell, president and CEO of iCONECT. “The addition of Heureka to our portfolio gives clients the ability to quickly identify and analyze data in-place and expedite collection of highly targeted information into iCONECT. Additionally, Heureka’s advanced data classification engine can automatically identify personally identifiable information (PII) and other sensitive data.”

The GSA IT Schedule 70 and NASA SEWP are contract vehicles used by companies to sell IT products and services to the U.S. government. Listing on the Schedule involves a rigorous evaluation process: the U.S. government carefully evaluates a company’s proficiency and suitability for providing products and/or services. The GSA Schedule is the largest, most widely used acquisition vehicle in the federal government and provides direct access to products, services, and solutions from more than 5,000 certified industry partners. The SEWP contract consists of 146 prime contractors, including 120 small businesses and has an outstanding track record of serving up fresh technology for federal agencies.

As a foundational company in the eDiscovery landscape, iCONECT continues to innovate, optimize efficiencies and streamline the identification, collection, review, analysis and production of legal documents and multi-media files. Partnerships with best-of-breed companies like Heureka expand iCONECT’s impact. iCONECT-XERA is used by hosting providers, law firms, legal departments and government agencies worldwide to collect, organize, search, sort and produce evidence in some of the world’s largest and most complex legal matters and archival projects.

iCONECT software and Heureka software and services are available immediately via immixGroup’s contract vehicles.
