

GHN Announces Agreement with 3M Health Information Systems

The 3M™ Edit Engine Brings Enhanced Coding and Compliance Functionality to GHN's Visum for Healthcare Claims Revenue Cycle Management

Dallas ([PRWEB](#)) November 25, 2008 -- GHN-Online®, the healthcare industry's leading provider of real-time, [revenue-cycle management solutions](#), has signed an agreement with 3M Health Information Systems to offer coding compliance editing and medical necessity validation integrated with solution for revenue cycle management. 3M's content combined with Visum will help healthcare providers reduce claim denials, shorten A/R cycles, and enhance workflow efficiency.

With the agreement, GHN customers will gain access to the 3M™ Edit Engine, a modular software platform that enables users to access current and historic Medicare and Medicaid data sets, including Current Procedural Terminology (CPT®) codes, Healthcare Common Procedure Coding System (HCPCS) codes, International Classification of Diseases (ICD-9) Codes, as well as national and local coverage determinations. 3M's industry-leading medical necessity content is created and maintained by a skilled team of healthcare policy and coding specialists.

"3M enhances our evolving revenue-cycle management ecosystem for [ASCs, labs and hospitals](#)," said Azadeh Farahmand, president and CEO of GHN-Online. "Integration of the 3M Edit Engine with Visum will effectively help to reduce client denial rates by enriching Visum with a code-content library, which gives billing departments real-time actionable data, spanning physician- and procedure-specific market data."

"We are pleased to partner with GHN," said Ann Chenoweth, vice president, 3M Health Information Systems, [Medical Necessity and Compliance](#). "The integration of the 3M Edit Engine with GHN's Visum will help ASCs improve compliance and realize cost savings by reducing time-consuming claims rework and resubmission."
