West Coast University-Dallas Relocates to Enhance Programs for Current and Future Students

WCU-Dallas will relocate to Richardson, Texas

DALLAS (PRWEB) October 11, 2019 -- West Coast University opened its doors in Dallas in 2012 determined to provide students with a learning environment that emphasized integrated and innovative practice that produced confident, collaborative graduates. Continuing with that vision, WCU will relocate its Dallas campus to 2323 N. Central Expressway, Richardson, Texas for a better overall experience for its students.

“We are making a difference in the lives of our students so that they can make a difference in the lives of others,” said WCU-Dallas Executive Director Duemand Edwards. “We are thankful for the partnership and commitment of the Dallas-Fort Worth community who helped make the experience for West Coast University’s students extraordinary and we are honored to continue our support. Additionally, we are honored to continue our local involvement and become a part of the Richardson community.”

The new facility will offer 140,000 square feet of innovative learning space, providing room for a larger simulation center, more classrooms and common areas for students. The new building in Richardson will allow us to expand and improve our students’ learning environment, provide ample parking and allow for future programmatic growth. Students will transition to the new building and begin taking courses on January 25, 2021.
