Supply Services Limited, New Zealand, increases production capabilities with new Doosan CNC machinery

Since 1980 we have built an enviable reputation for delivering reliable, high quality, performance engineering materials and solutions to businesses involved in all sectors of New Zealand industry. We support some of the country’s largest producers and manufacturers across a wide and diverse range of industries.

TAURANGA, New Zealand (PRWEB) October 12, 2019 -- Recently, Supply Services Limited installed a new Doosan Puma GT2600M mill turn lathe for increased production capacity and in-turn allows for the rapid production of customers finished parts from their extensive range of high performance engineering plastics.

The Puma GT allows Supply Services Limited to CNC machine parts in a single operation without the need for stopping production to complete the part in another CNC machine.

This has created production efficiencies and significantly reduced customers lead-time for their finished parts.

Our three machining shops located across New Zealand is where the magic happens. As well as conventional turning and milling capabilities, we have skilled CNC operators who can turn your material or idea into components.

Contact Supply Services today to discuss any engineering plastic or CNC machining requirements your business may have.

Whatever you're engineering, we can help.
