LogRhythm Offers Migration Service to Splunk Customers to Address Ongoing Security Challenges Without the Financial Burden

Migration Service Offering Empowers Organizations to Focus on Defending Their Data Without the Stress of Volatile Pricing

BOULDER, Colo. (PRWEB) November 05, 2019 -- LogRhythm, the company powering the world’s enterprise security operations centers (SOCs), today announced a migration offer for current Splunk customers to easily transition to the LogRhythm Platform. By offering a 100 percent trade-in credit for up to a year of remaining time on their current Splunk subscription, this limited-time Splunk migration offer helps eligible organizations alleviate any added financial burden from unpredictable pricing by migrating to the LogRhythm True Unlimited Data Plan.

To make the migration process even easier, LogRhythm is offering a tailored migration service to Splunk customers — enabling customers to save time and resources when deploying the LogRhythm Platform. With the assistance of experts familiar with both platforms, new LogRhythm customers can be assured they will be up and running on the platform, and ready to face security challenges as quickly as possible.

“Oftentimes, companies are forced to continue a relationship with a vendor until their contract ends or risk incurring financial penalties and the added expenses of a technology transition,” said Mark Logan, CEO, LogRhythm. “With this pricing offer, companies can immediately utilize the LogRhythm Platform to protect unlimited amounts of data. Customers should not be forced to choose what data to monitor and protect due to vendor licensing constraints. With this offering, we are ensuring that CISOs are empowered to achieve their goals without sacrifice.”

Announced on October 1, 2019, LogRhythm delivered the industry’s first unlimited capacity licensing model for its NextGen SIEM, giving customers the opportunity to protect all of their data at one flat rate. This offer is available to customers who decide to switch to LogRhythm between now and December 31, 2019. More information can be found at:
- True Unlimited Data Plan
