METALgrommets.com Introduces Self-Piercing Solid-Brass Grommet Sets That are Non-Rusting for Outdoor Applications

METALgrommets.com has introduced a new line of ClipsShop® heavy-duty solid brass rust-proof grommets and washers that come in a variety of sizes and finishes for use in privacy screens, wind screens, sunscreens, and related outdoor products.

DIGHTON, Mass. (PRWEB) November 06, 2019 -- METALgrommets.com has introduced a new line of heavy-duty solid brass rust-proof grommets and washers that come in a variety of sizes and finishes for use in privacy screens, wind screens, sunscreens, and related outdoor products.

ClipsShop® Self-Piercing Grommet Sets include grommets and washers made from non-rusting solid brass for withstanding rain and the elements. Offered in #2, #3, #4, and #5 (3/8” to 5/8” I.D.) sizes, they come in nickel, brass, antique brass, and black oxide weather-resistant finishes that are especially designed for outdoor applications.

Available in 500 set packages of grommets and washers, ClipsShop® Self-Piercing Grommet Sets can be attached using the firm’s manual and pneumatic grommet presses. Typical uses include outdoor screens that attach to chain-link fences for privacy, or to provide a wind screen or shade in nurseries, construction sites, playgrounds, and more.

ClipsShop® Self-Piercing Grommet Sets are priced according to size and quantity. Samples are available upon request. Dealer inquiries invited.
