Let’s Talk Interactive and Howard Technology Solutions Partner to Provide Greater Access to Medical and Mental Health Care

Let’s Talk Interactive, a leader in customizable telehealth networks, and Howard Technology Solutions, a manufacturer of premium kiosks, medical carts, and telehealth solutions, are teaming up to create telehealth programs that are scalable and widely accessible—ensuring people get the help they need.

CHARLOTTE, N.C. (PRWEB) November 06, 2019 -- Let’s Talk Interactive, Inc., a leader in customizable Telehealth Networks and Solutions, today announces a partnership with Howard Technology Solutions, a manufacturer of premium kiosks, medical carts, and telehealth solutions. The partnership will combine Let’s Talk Interactive’s secure, HIPAA-compliant online software with Howard’s customized telehealth hardware, providing unparalleled access to quality mental, acute and emergency healthcare to anyone who needs it.

“Together with Howard, we have the ability to deploy thousands of devices across the country. As a result, we’re in a position to deliver on state and federal levels—driving a new era in the way healthcare and mental health care services are delivered,” remarked Arthur Cooksey, Founder, Let’s Talk Interactive, Inc.

According to the Association of American Medical Colleges, the U.S. will see a shortage of up to nearly 122,000 physicians by 2032 as demand for physicians continues to grow faster than supply. “The doctor shortage in the U.S. is significant and is only getting worse. Our partnership enables us to be at the forefront of developing solutions that provide better access to Medical and Mental Health Care for all Americans,” noted Josh Botbol, President, Let’s Talk Interactive.

“We have seen the impact that Telehealth has had to date—providing interactive healthcare options to underserved areas and many who might otherwise have to forego treatment,” said David Perkins, Vice President of Technology Sales, Howard. “By partnering with Let’s Talk Interactive, we’re able to create telehealth and telemental-health programs that are scalable and widely accessible, with the end goal of ensuring people get the help they need.”

Let’s Talk Interactive and Howard Tech recently customized and installed 63 Telehealth Kiosks and 63 Telehealth iPads Portals in six Florida Panhandle counties, equipping every public school with a portal in time to start the 2019-2020 academic year. The customized Telehealth Kiosks and Telemedicine Software Portals enable more than 60,000 school-aged children to access much-needed care for those affected by life stressors, primarily the trauma and devastation caused by Hurricane Michael in October of 2018. The initiative is spearheaded by First Lady DeSantis and Big Bend Community Based Care (BBCBC) CEO Mike Watkins.

About Let’s Talk Interactive, Inc.
Let’s Talk Interactive, Inc. is a complete end-to-end Telehealth solutions provider, arming medical and behavioral health professionals with cutting-edge Health Insurance Portability Accountability Act (HIPAA) video conferencing software, kiosks and medical carts, network solutions, virtual clinics, and safe and secure online video conferencing capabilities while giving those in need instant access to care through its innovative technology platform.
