Buehler Announces Quick Delivery of Full Metallographic Lab Solutions

Fast growth industrial companies in aerospace, defense, medical device, electronics, metals along with research /development organizations, and educational institutions cannot afford to wait for metallographic equipment when they are ready to start a new lab. Buehler announces that with improved manufacturing schedules the company can deliver complete metallographic labs in less than four weeks.

LAKE BLUFF, Ill. (PRWEB) November 06, 2019 -- Buehler is proud to offer the complete Full Lab Solution with metallographic and hardness testing equipment that is designed and manufactured by Buehler to ensure the highest quality and utmost performance. Buehler’s account and applications teams are trained to help create new metallographic laboratories with equipment that ensures repeatability and reliability in the quality control or inspection testing process. Buehler developed the Full Lab Solution to meet the needs of new or growing research and development, medical device, electronics testing and other industry labs with innovative, intuitive and dependable equipment that ships fast to meet fast track deadlines.

Buehler’s Full Lab Solution delivers reliability and repeatability for metallographic sample preparation and testing process in these industry applications:
• Heat Treatment
• Automotive Industry
• Aerospace Industry
• Medical Industry
• Electronics
• Universities/Research & Development

Agile companies and institutions in all sectors cannot afford to wait for quality control or production inspection lab equipment. Fernando Castillo, Buehler Operations Director explains, "We are proud to deliver the Full Lab Solution with equipment that is designed and built by Buehler. Buehler manufactures innovative and dependable metallographic equipment and hardness testers that ship fast to meet our customers' timeline."

Because Buehler is also the manufacturer of the equipment, the company can ship fully functioning lab with the following equipment in less than four weeks.

• Precision Cutter IsoMet High Speed Precision Saw
• Mounting Press SimpliMet 4000Mounting Press
• Grinder / Polishers AutoMet and EcoMet
• Burst Dispensing Systems
• Software Programs DiaMet Hardness and OmniMet Imaging
• Vickers Hardness Tester Wilson VH3100 All-in-OneVickers Hardness Tester
• Rockwell Hardness Tester -Wilson Rockwell 574
• Test Blocks and Consumables

Buehler Offers Support After Purchase

Buehler delivers proven customer-backed innovations for the most demanding environments whether operating in Quality Control, Research / Development or Educational setting. Buehler support programs include with a
Buehler, An ITW Company is a leading provider of complete metallographic and hardness testing lab equipment solutions, consumables and analysis techniques for use in materials preparation, image analyses and hardness testing. Buehler products cross a wide variety of industries, including Primary Metals, Automotive, Aerospace and Defense, Electronics, Medical, Energy and more. For information on the Full Lab Solution for your application visit www.buehler.com or email marketing@buehler.com.
